1. Overall Description:

SA4 thanks IMTC H.324 Interoperability AG for their contribution on the bit-order for 3G-324M terminals. SA4 reviewed this LS and came to the conclusion that the reason for the problems result from misinterpretation of the appropriate standards. SA4 could not detect any errors or missing specifications.

However SA4 understands that without any notice to the implementer this problem will occur again and may generate interoperability problems. SA4 will include additional information in the 3G-324M implementor's guide TR 26.911 for clarification.

SA4 thanks IMTC for their contribution and looks forward to exchange more information if required.

2. Actions:

No action required.

3. Date of Next TSG-SA4 Meetings:

TSG-SA 4 Meeting #26	5th – 9th May 2003	tbd.
TSG- SA 4 Meeting #27	7th–11th July 2003	Munich, Germany
